SILENTNITE[®]
SLIDE - LINK

Without Silent Nite sl, the volumetric capacity of the airway is reduced. This causes snoring!

Silent Nite sl positions the lower jaw forward, increasing the volumetric capacity of the airway. This aids in the prevention of snoring

What Our Patients Say:

"It worked the first night I used it! Truly amazing! I have used it for a few weeks and it takes just a little getting used to. My wife is absolutely thrilled!
